DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-8, drawn to a stabilizing agent for hemoglobin comprising a sulfur containing compound.

Group II, claim 9 drawn to a method for stabilizing hemoglobin via adding a stabilizing agent too hemoglobin.

Group III, claim 10, drawn to a composition comprising hemoglobin and a stabilizing agent.

Art Unit: 1651

Group IV, claim(s), drawn to a kit comprising a stabilizing agent and hemoglobin .

Group V, claim 12, drawn to the use of sulfur containing compound.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The alleged special technical feature is a sulfur containing composition. Sulfur containing compositions are old and known in the art. Sulfur itself is a 'sulfur containing' composition. Further, the amino acids cysteine and methionine are known amino acids. Therefore, the alleged special technical feature does not contribute over the prior art and does not constitute a true special technical feature according to PCT Rule 13.1.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A sulfur containing compound.

Applicant is required, in reply to this action, to elect a single species of sulfur containing compound to which the claims shall be restricted if no generic claim is finally held to be allowable (i.e, cysteine or methionine). The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 1651

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1-12.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the sulfur containing compound of the broad claim may be any sulfur containing compound such as sulfur dioxide which is not an amino acid.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
